

CONNECTED TO INNOVATION

Reels with controlled hose return

NEW

SUPPLY FOR TOOLS AT WORK STATIONS

Easy to operate

- Ratchet automatically locks hose at desired length
- Ceiling or wall mounting bracket
- Bracket swings 180°

Workplace efficiency

- Rational supply for tools at work stations
- Operator convenience
- Tools are quickly and safely connected with a **prevoS1** quick release safety coupling

CONTROLLED HOSE RETURN

Safety use

After the ratchet is released by the operator, a control system, in the reel, returns the hose gradually. The operator can safely let go of the hose thanks to a brake system.

Yellow travel limit stop =
Reel with controlled return hose

Automatic hose reels are essential basic items of equipment for workshops. They save time and improve comfort and safety when using flexible distribution hoses. Controlled return hose reels ensure optimum safety during use and when storing the hose after use.
